

# **7 Safety Tips If You're Flying During COVID-19 Pandemic**

**It's been a long while! Are you planning to travel?**

Here are **SEVEN** ways to make it a little safer.

## **1. TRAVEL INSURANCE WITH COVID COVERAGE**

Get your Travel Insurance Policy to extend for Covid protection.

## **2. STAY UP-TO-DATE WITH TRAVEL NEWS**

Stay informed of COVID-19 activity at your destination to better understand their public health measures, the latest COVID-19 safety protocols, and requirements.

## **3. WEAR YOUR MASK THROUGHOUT YOUR TRAVEL**

Masking up is one of the best – and proven – methods we have against COVID-19, and it remains true for air travel too.

## **4. WASH YOUR HAND (and avoid touching your face!)**

Wash and scrub your hands for at least 20 seconds. Carry a hand sanitizer and apply it after touching common surfaces, avoid touching your face with unwashed or unsensitized hands.

## **5. STAY CLEAR OF THE CROWD AT THE AIRPORT**

It's also a good idea to reduce COVID-19 risks by staying clear of the crowd, and maintaining a meter distance from other passengers as much as possible, even if that means sitting at a less crowded gate.

## **6. SANITIZE YOUR SPACE IN THE PLANE**

The Coronavirus can last on non-porous surfaces for about three days. We suggest cleaning your space in the plane with anti-bacterial or disinfectant wipes.

## **7. IF YOU'RE UNWELL, DON'T TRAVEL**

If you are sick, you could bring COVID-19 back to your loved ones and inadvertently spread the virus to people during your travel or at your destination. A good rule of thumb is to never fly when you have a fever.
