

# PREVENTION IS BETTER THAN CURE

Top 5 causes of death in Malaysia :-

1. Ischaemic heart disease;
2. Pneumonia;
3. Cerebrovascular diseases;
4. Covid-19 infection;
5. Transport accident

The statistic of the National Health and Morbidity

## Survey in 2023

The heart diseases and cardiovascular diseases (CVDs) were **caused by 3+1 important health issues**, namely: –

1. Diabetes;
2. Hypertension;
3. High cholesterol plus
4. Obesity

## **Effective strategies to embody the principle of “prevention is better than cure.” : –**

- **Regular Health Check-ups:** Helps to detect potential health issues early.
- **Vaccinations:** Immunizations prevent diseases before they occur.
- **Healthy Lifestyle Choices:** Eating a balanced diet, exercising regularly, and avoiding harmful habits like smoking can significantly reduce health risks.
- **Regular Exercise:** Helps to maintain a healthy body.
- **Stress Management:** Techniques like meditation, yoga, and mindfulness can help manage stress, which can prevent various health issues.
- **Education and Awareness:** Learning about potential risks and how to mitigate them can empower individuals to make informed decisions.
- **Hygiene Practices:** Regular handwashing and

proper sanitation can prevent the spread of infections.

- **Mental Health Support:** Seeking help and support for mental health can prevent crises and promote overall well-being.
- **Community Programs:** Participating in community health initiatives can promote collective well-being and prevention strategies.

Implementing these measures and living habits can help reduce the likelihood of health issues and enhance overall quality of life.
